Experience

Active Heaven

2024 (Database Full Stack Website)

- Developed responsive, accessible UI with HTML, CSS, and JavaScript.
- Implemented client-side logic and data handling; integrated with back-end APIs.
- Managed the codebase on GitHub and iterated on performance and UX improvements.

AI Image Detection

2024 (Image Detection Model with YOLOv11, Python)

- Built and trained a YOLOv11 object-detection pipeline in Python with data preprocessing, augmentation, and hyperparameter tuning.
- Delivered reproducible inference and evaluation scripts for deployment; optimized model performance and maintained the codebase on GitHub.

InfoNest

2025 (Full-Stack Chatbot Website)

- Built a responsive React chat UI with real-time messaging, conversation history, and secure auth (JWT & Google OAuth).
- Implemented Node.js/Express back end integrating Rasa NLU and Gemini API, persisted data in MongoDB, containerized with Docker, and deployed on Render.
